MESSAGE FROM THE ORGANIZERS

The silver jubilee edition of MACTECH – the International Exhibition for Metal Forming Machines, Industrial Tools, Welding & Cutting Equipment marked a significant milestone in the history of one of the region's most influential industrial events. Held from 18–21 December 2025 at the Egypt International Exhibition Center (EIEC), this 25th edition celebrated a legacy of innovation, industrial excellence, and continuous growth that has positioned MACTECH as a cornerstone exhibition for the metalworking and manufacturing sectors in Egypt and the wider Middle East and Africa.

Over four dynamic days, MACTECH 2025 brought together leading local and international manufacturers, suppliers, and technology providers, showcasing the latest advancements in metal forming machinery, CNC systems, industrial tools, welding technologies, and cutting-edge automation solutions. The exhibition floor reflected the rapid transformation of the industry, with a strong focus on smart manufacturing, productivity enhancement, energy efficiency, and precision engineering, offering visitors a comprehensive view of current and future market trends.

The silver jubilee edition also served as a powerful networking and business platform, attracting thousands of industry professionals, decision-makers, engineers, and factory owners. MACTECH facilitated high-level B2B meetings, live machine demonstrations, and technical discussions that fostered partnerships, knowledge exchange, and new investment opportunities. Its role in connecting global technology providers with the Egyptian and regional industrial markets was more evident than ever.

As MACTECH celebrated 25 years of impact, the 2025 edition reaffirmed its commitment to supporting industrial development, localization of manufacturing, and technology transfer. By consistently adapting to the evolving needs of the sector, MACTECH continues to play a vital role in strengthening Egypt's position as a regional industrial hub and in shaping the future of metalworking and manufacturing across the region.
